

to Wellington 1840

I forget to advise
about the proposed sketch
of Shedel's Abente. I
should not like to take
any engagement without
seeing the thing done. All
depends on the cleverness of
the execution.

What do you mean by
Lugart's picture of Shedel
is the harpichord? I never

heard of any prints of the kind
I hope I shall be able to
pay a visit to Lord St. Vess
Tuesday and will shall speak
about this your new discovery

I remain Dear Sir
Yours very truly

W. Charles
